Research Triangle Park, NC 27709

Dear Dr. Masten:

I am so glad to hear that research is proposed for
hexafluorosilicic acid and sodium hexafluorosilicate,
the main agents used in water fluoridation.

For years the safety of fluoridation chemicals has
been assured, yet the EPA informs us that there
has never been a study of any kind on the
silicofluorides.

I urge you to proceed with research on such
products as soon as possible.

Sincerely,

Jean McCone
